## **DETAILED ACTION**

### **Status of the Application**

Receipt of the Request for Continued Examination (RCE) under 37 C.F.R. 1.114, the Amendment and Applicant's Arguments/Remarks, all filed 06/04/07 is acknowledged.

Claims 1, 3, 4, 8 and 10-14 are pending in this action. Claim 1 has been amended. New claims 10-14 have been added. Claims 2, 5-7 and 9 have been cancelled. Claims 1, 3, 4, 8 and 10-12 are rejected. Claims 13 and 14 are objected.

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 06/04/07 has been entered.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1, 3, 4, 8 and 10-12 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Applicant in their response filed 06/04/07, has amended the claims to recite that the “trace element solution comprises a metal concentration of at least 60 mg/ml”. The limitation of a metal concentration comprising “at least 60 mg/ml” introduces new matter into the instant claims. Applicant has not provided ample support for the amended claim language. A review of the instant specification indicates that all of Examples 1-7 permits ranges *less than* 60 mg/ml of metal concentration. The fact that an example has 60 mg/ml does not establish that, at the time of the invention, Applicant was aware that the use of “at least 60 mg/ml”, which has a scope well above 60, was a critical lower limit for their claimed invention. There is no specific teaching to combine Examples 6 and 7 of the instant specification. Thus, the claim language reciting “at least 60 mg/ml” of a metal concentration introduces a new concept not disclosed in the original specification.

***Allowable Subject Matter***

Claims 13 and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
